

InnoClean™ Wipes

4000 Series – 180 gsm

Laser-cut Microfiber Wipes

Description

Microfiber wipes are knitted with blended nylon and ultrafine polyester materials. This type of wipes has superior absorbency and the knitting configuration which improves pickup of contaminants from glass, metal and ceramic surfaces. Recommended for ISO 5-7 (Class 100 - 10,000) cleanroom environments.

Notes:

- 1.) The test method for the product characteristics are based from IEST-RP-CC-004.3, entitled Evaluating Wiping Materials Used in Cleanroom and Other Controlled Environments.
- 2.) The data presented applies to the part numbers shown above as well as to any product that is manufactured from the same material and has undergone the same process, regardless of its product size or packaging composition.
- 3.) Values provided are of typical results and should not be considered as product specifications for these certain products.
- 4.) Product comparisons may be only be deemed as valid under the same testing methods in the same facility with similar environment.
